What Do You Need to Become Wealthy and Financially Free?

Before answering this question, let's define a wealthy person.

A wealthy or rich person isn't necessarily someone who has a lot of money or assets and belongings. Money may be considered the most important part of being rich, but it is not everything. Wealth also brings with it certain freedoms.

Freedom is priceless, so it could be said that a person who is truly rich is someone who is truly free.

Wealth means that a person is his own boss and nobody tells him what to do and how much to work (time freedom). He is also financially free, so he can have the type of life he wants: he can buy anything he wants (purchasing freedom), go anywhere he likes, live everywhere he prefers (location freedom), and do whatever he wants.

At LuckScout.com, our goal is to help make you a rich person, not just someone who makes some money every month. We don't guarantee or promise any income, but if you follow our guidance and system (which is not that hard), you will be perfectly positioned for unbelievable results.

Why Are We Different?

The others just sell some eBooks, videos or training courses to you. Then they leave you alone.

We don't leave you alone. We spend lots of time to run everything for you.

What you receive from us, is literally priceless. Our team set up all the systems for you, support you, answer your questions and help you to start making money as soon as possible, as per the instructions they receive from us.

You are at the right place right time. **Congratulations!**

Please read this eBook entirely. This is not a too long eBook. But it can change your life and can prevent you from wasting your time and money.

Why?

Because it shows you how to make the most of what we offer at LuckScout. If you follow us properly, you will achieve financial freedom. So, do yourself a favor and read this eBook and keep on following us if you want to change your life.

Now, let's answer the question of what you need to become wealthy:

1) A Proper Mindset and Mentality

If you are here because you want to become financially free, rich, a multi-millionaire or billionaire, then you are in the right place and this eBook is written for you.

The first and most important thing you need to reach your goal is to have the proper mindset.

If you want to become rich, you have to think and behave like the rich, no matter if you currently have any money or not, no matter how old you are, where you are from, or what you know.

If you have been able to subscribe to our mailing list and have downloaded this eBook, you are already positioned to become wealthy... I mean extremely wealthy.... How? Because you already have everything you need to get started, according to our business plan: a computer + Internet skills + access to the Internet. You have these, which is why you are reading this book now.

So you've already passed 50% of the stages. All you have to do now is (1) take the proper actions and (2) keep on following us and do not give up before you reach your goal, which is to become wealthy and financially free. You are lucky because we are with you and we support you step by step.

Having a proper mindset and thinking like a successful and hard-working businessperson is what you need to take actions and keep working toward your goal.

2) Strong Support and Motivation

Who is going to help you develop and maintain such a mindset, the enthusiasm, and the inner energy needed to motivate you until you reach your goals?

Keep in mind that taking action without having the proper mindset and enough enthusiasm to propel you forward, can be a waste of time and money, because you may give up when you are partway there, even when you've had a good and strong start.

How much better to have someone to show you the right way, to motivate you, to guide and inspire you? Otherwise, there is a very high probability that you will not reach your goals.

Is there a person or a team that can help you to achieve your goals and cross the finish line?

Yes, there is:

1-on-1 Coaching

We have a team of experts who are ready to help you along the way. You will have your own personal coaches who take your hand, so to speak, and help you pass the stages and steps without any problems.

You can't go wrong. And you won't give up at the mid-point, because you'll have our support plus all the benefits of the proven and well-developed business plan we offer.

Becoming wealthy is not too hard anymore. At least it is not too hard for you, because you are following us and you will have our support along the way.

3) A Proven Business Plan

Have you ever heard about the most successful businesses and their high success rates?

Do you know what kind of businesses they are, how they actually work, and what they do to achieve such phenomenal success?

You might figure these involve trading or investment in currency or in the stock market.

Trading and investment in currency or the stock market can be very risky, and often, success rate is very low.

An estimated 95% of traders lose. After trying to learn the ropes, failing, and wasting both time and money, they give up.

According to the information we have collected from LuckScout followers, less than 1.5% of currency traders are consistently profitable. Additionally, less

than 1.5% of the consistently profitable traders are fulltime traders who make a living through trading.

This means that over 98.5% of traders cannot make money through trading, and those who can, aren't fulltime traders because they can't make enough money through trading and/or they don't feel that trading is a safe and secure enough fulltime endeavor.

It's getting harder every day to make money through trading currencies and stocks.

Now don't get us wrong. We aren't saying that trading and investment don't work at all. There are some people who make decent money through trading and investment in the currency and stock markets. But, back to the question we raised at the beginning of this section about the most successful businesses with the highest success rates...

As can be seen, can currency or stock trading really be said to be the most successful and with very high success rates?

The answer is, currency and stock trading are good investment opportunities to force your money to make more money for you. They are great investment opportunities, but most people try to use them as the full-time jobs to make a living with. It doesn't work like that.

However, if you know the right way of investing your money in the currency and stock markets, you can increase your wealth dramatically and become multi-millionaire or even billionaire.

We will explain more. Just please keep reading.

Now, let's look at another business model. According to IFA or International Franchise Association, 90% of franchisees renew their agreements at the end of their contracts.

Note: We are not going to encourage you to become a franchisee. We are just analyzing a successful business model. Then we will talk about our own business model, which is even better. Please be patient and keep reading.

Franchisees are people who buy into a franchise business and leverage someone else's proven business model.

According to Franchise Business Review:

- 90% of franchisees enjoy operating their business
- 88% of franchisees enjoy being part of an organization
- 85% of franchisees feel positive about their affiliation with their franchisor
- 80% of franchisees feel their franchisor operates with a high level of honesty

- 78% of franchisees would recommend their franchise brand to others
- 73% of franchisees would "do it all over again" if they had the option

This raises important questions:

Why do franchises have such a high success rate?

Why do franchisees respect this business model and their franchisors?

Why are they keen to keep working their franchise?

And... why is it the other way round with other business owners and businesses?

In comparison, according to US Bureau of Labour Statistics, about half of all new establishments only survive five years or more and about one-third survive 10 years or more. The hard reality is that half of new establishments can't survive past five years and they go bankrupt and close.

According to Bloomberg, 8 out of 10 entrepreneurs who start businesses, fail within the first 18 months. This means 80% of them are bankrupt in less than 18 months. Many others will go bankrupt after 18 months.

So why are franchises so different?

Because franchise businesses have something independent businesses do not:

Franchises operate using a "Proven System."

Franchise businesses have a well-developed and proven system and a business plan, which has been optimized and upgraded for years, and known to work very well.

When someone decides to join a franchise company like McDonald's and becomes a franchisee, he has to take and graduate from special training courses that teach him how to run and manage a McDonald's outlet, before ever being permitted to run his outlet.

The McDonald's company supports him to operate the outlet. They provide everything, all the equipment and tools, along with close and direct support and guidance. They even help him choose the best location to establish the new outlet.

When the outlet is launched, the company will keep on supporting and helping the franchisee, so as to enable him to manage and promote his franchise business in the best possible way and with the highest possible profit.

Therefore, the franchisee can't go wrong. He is not dependent on just his own experience and knowledge, which is not enough in 99% of cases. He has a mentor who is dedicated to showing him the way and supporting him along the way.

However, when someone decides to run a business on his own, he has to do everything by himself. There is no doubt that in most cases he won't be able to get the business off the ground and he will close after a short while. That is why 8 out of 10 entrepreneurs who start businesses, end up failing within the first 18 months. These businesses are dependent on the knowledge and experience of an owner, and they are not supervised by a big and financially robust company, such as a franchise company like McDonald's or Starbucks.

OK! So What?

So far, you've learned that following a "Proven System" or a "Proven Business Model" is the success key.

However, although we explained that the franchise business model as a "Proven System" and "Proven Business Model", has a high success rate, we are not going to encourage you to become a franchisee.

Do you know why?

Because there is something about becoming a franchisee that we haven't told you yet:

According to Entrepreneur.com, you have to be able to afford an initial investment of between \$1,003,000 and \$2,228,000 to run a McDonald's outlet. And on top of that, a \$500,000 liquid cash and a \$45,000 initial franchise fee are required.

Additionally, there is an ongoing royalty fee of 4% and an ad royalty fee of 4%+.

McDonald's

Burgers, chicken, salads, beverages

It is almost the same scenario with the other franchises. Many of them, like Hampton by Hilton are much more expensive:

- \$4,213,600 - \$14,896,500 initial investment
- \$75,000 initial franchise fee
- Ongoing royalty fee of 6%
- Ad royalty fee of 4%

Therefore, you already have to be a millionaire to run a McDonald's outlet or a Hilton hotel. There are many other franchises that are cheaper, but none of them are free. You have to have lots of money to become their franchisee.

In spite of having such a high success rate, the financial requirements that running a franchise business entails are out of reach for many, and thus, most people stay away from this type of business. You have to have a lot of money already, in order to make money with a franchise business.

The rich get richer and the poor get poorer...

Does it mean that you can't get rich if you don't have enough money to become a franchisee?

Also, according to what we already explained, running your own business is not the solution too because it doesn't have a reasonable success rate.

Additionally, unlike what most of those who are after making money through currency or stock trading, think, turning a small trading account into a big wealth through the retail brokers, is impossible. Not only it is impossible to grow a small account and get rich through it, but also it is impossible to make money consistently and make a living that way (we will explain more about the reasons later in this eBook.)

But wait...

There is a much better solution for you, even better than running a McDonald's outlet or a Hilton hotel. Just keep reading...

Before you go ahead and read the rest of this eBook, there is something that you should keep in your mind:

Most of those who are rich now, were once poor. Their proper mindset and positive mental attitude helped them take action and find the best way and the right methods of becoming wealthy. Many of them made mistakes and fell down numerous times, but they got right back up again and kept on going, until they made their dreams come true.

Fortunately, you don't have to follow in their footsteps and try to navigate the challenges and work through all the hard and complicated stages they passed. Thanks to modern technology, you can make a fortune sitting at your personal computer and working by means of the Internet.

You can become rich and then richer without having to run a brick and mortar business, or even without leaving your home.

How?

Through following "Our Proven Business Model" which has already created so many millionaires.

Here is how our "Our Proven Business Model" works for you and makes you rich and then richer:

Our Proven Business Model

All of the successful multi-millionaires and billionaires like Warren Buffett, have achieved their wealth and success in two steps:

Step #1) They've learned to make a lot of money.

Step #2) They always invest (force) a portion of the money they make, to make more money.

They keep on (1) making money, and, (2) investing to make more money.

They've learned to **force** their money to **make** more money for them.

This is the key-secret of achieving money, time and location freedom.

This is exactly what we do and we help our followers to do too.

Therefore, to follow this business model, first we have to build a reliable and strong source of income that makes a lot of money consistently.

Then, while our source of income makes money for us, we should invest a portion of the money we make, in the currency, stock and real state markets, to make more money and increase our wealth.

This is how you can become rich and then richer.

You can't get rich without having a reliable and strong source of income. Also, you can't get rich by making and saving money, because the money you save, loses its value gradually because of the inflation.

Now the question is, how can you create a reliable and strong source of income?

Another question is, how can you **force** the money you make, to **make** more money?

This is exactly what you are here for.

We help you to achieve this in the best and easiest possible way.

Here is what we do for you:

Step #1) We create a fully-automated source of income that makes lots of money for you, automatically and consistently.

Step #2) We show you the best investment opportunities on the currency, stock and real estate markets, so that you can invest (force) your money to make more money.

The step #1 makes you rich.

The step #2 makes you richer.

This is how you get rich and then richer.

There is no better and easier way to achieve this.

So, We Have to Complete the Step #1 First:

How do we create a fully-automated source of income for you?

As it was explained before, to run a successful business that makes a lot of money consistently, you have to follow the “Proven Business Models”.

You can't do it by running your own business and following your own business models, because you will have such a low success rate. The reason is that your business models are not proven. You don't know whether they work or not. You have to take risk and try your business models through a trial and error process. This is not correct at all, because life isn't long enough to follow such a long way to get rich, nor do you have so much money to risk in a never-ending trial and error journey.

Following the proven business models, like becoming a franchisee, is a much better way as it was explained earlier in this eBook. However, not everybody can afford it. Besides, becoming a franchisee, like running a McDonald's outlet, doesn't make you rich, nor does it give you time and location freedom. It is a 24 hours a day 365 days a year non-

stop work that doesn't make over \$500,000 profit under the best condition and in the best scenario.

So What Is the Solution?

Instead of spending so much money on running a franchise business, and then working long hours to maintain and promote it, you can follow "Proven Systems" that work via the Internet.

We have an online business system which is the best and strongest in the history of the Internet and computer.

Compared to franchise businesses like McDonald's, our online business system is inexpensive and almost free to join, so it is much easier to start making money.

Above all, you receive free training and support, even better than what franchise companies offer to their franchisees. We set up everything for you while you don't have to know anything about computer and Internet, nor do you have to have any online business experiences.

And more exciting still:

There is a much higher potential of making money with our online business system. We have a team of experienced coaches ready to support and guide you step by step, from the first day that you join, until you start making money.

There are, in fact, many who have already made and are still making a lot of money using this system. Our system is well-developed and it's a proven system similar to the systems that franchise companies utilize, but with important differences...

(1) It is almost free to join and you can start making money with it, as compared to franchise businesses that require a lot of money at start-up and more money to keep the ball rolling.

(2) Our online business system can generate a lot more money, compared to most of the franchise businesses.

(3) It is much easier to work at our program, promote and maintain it; whereas having a franchise business is sometimes 24 hours a day, 7 days a week, non-stop work because you always have to supervise, even when you are home, to ensure staff does their jobs and in order to say on top of other problems that may arise.

(4) Our program has a team that offers much stronger and better support, which makes it much easier to train and learn what is needed to start the work.

(5) No need for non-stop supervision. Once it is launched, this is a system that works on its own and makes money even when you are asleep. Your income is safe and secure and you receive it without hassles and problems.

(6) You benefit and gain time, location and financial freedom, whereas a franchise business ties your hands with a lot of work and management tasks.

(7) This system generates passive income for you. That means the money keeps on coming in even when you stop working; whereas with other businesses, including some of the best franchise businesses, your income vanishes almost as soon as you stop working.

(8) Our online business system works 100% on autopilot if you want. It means it works fully-automated without having to lift your finger. You can work to boost your success and make more money faster, but you don't have to, because this system is developed in a way that it works automatically. It is fully-automated, because we wanted everybody, including those who have no computer, internet and online business experience, to make money with it without any problems.

(9) Unlike the other businesses, our online business system is scalable. It means you can increase its income as much as you want. This is an exceptional feature that only our online business opportunity has.

In general, our online business system sees a much higher success rate compared to the best and most successful business systems (franchises), with a lot more advantages and a much higher income potential, and with none of the disadvantages and

hassles that are part-and-parcel of franchise businesses.

Our system is designed in such a way that it generates passive income for you. The money keeps coming even if you stop working.

Compared to currency or stock trading or other franchise-type businesses, wherein your income (of course if you succeed to take the business off the ground finally to generate any income with it at all) stops if you stop working, this business continues making money even if you stop working after a while. And it doesn't involve some of the risks and hazards that may arise with trading and other types of businesses.

So, the first step of our proven business model, which is creating a reliable and strong source of income, will be achieved by following our online business system.

We set up the system for you to create the reliable and strong source of income you need to have to complete the first step. You need this source of income to become rich. Then you force a portion of the money you make to make more money. This makes you richer.

This is how the rich get richer 😊

Warning:

Now, it is a good time to give a warning to those who want to make money with retail currency or stock trading through the retail brokers and with having a small trading account.

Experience has proven that you can't make money consistently through retail currency and stock trading. All you can do is that you wipe out your small account and lose your money.

Currency and stock markets are great investment opportunities to increase your wealth, but they can't be used to generate income. You can't use them to make a living. Currency and stock trading are not full-time jobs. They are investment opportunities.

There are so many reasons for this. We've explained them in details on [our website](#). We don't want to make this eBook too long by focusing on the reasons of the retail currency and stock traders' failure. However, here is some of the reasons:

- 1) Unlike what most people think, currency and stock trading is not easy at all. It takes such a long time to master the trading techniques. Most people fail to do it because they don't have a good mentor and they don't know where to start and what to follow. Most people give up after a while of trial, error and losing money.

- 2) Retail brokers cheat their clients and don't let them make profit consistently every month, because

most of them are market makers. [Click Here](#) to learn more.

3) Currency and stock markets are sometime too slow and sometimes too volatile. It is not easy to locate the trading opportunities on them every day to make money, specially when you follow the shorter time frames. While you can't make any money for such a long time, a sudden and strong movement can wipe out the results of several months of your trading.

Please refer to the next page to see the examples.

A +2500 pips sudden price movement on CHF cross currency pairs, on 15th Jan 2015, made many brokers bankrupt and several months and years of many traders' efforts went down the drain:

Another sudden price movement for +1600 pips on GBP cross currency pairs, on 24th Jun 2016, did almost the same as what the 15th Jan 2015 movement did to impact some traders and brokers. These price tsunamis, occurring every once in awhile, are enough to wipe out the results of several months or even years of trading:

Robert Kiyosaki: ([click here](#) to watch him while saying the below words.)

"The thing that scares me right now is that we have never had so many people in the history of the world betting their retirements on the stock market... and they have bet real money.

and... trust me... the market will crash... always has and always will."

The memory of 1987 black Monday when the stock market horribly crashed:

Ben Carlson @awealthofcs · Oct 19

Markets look easy in hindsight but are always much harder in real time. Here's the Black Monday 1987 crash as described by one of my readers

As one who was actually invested in 1987 (and since 1973), I still have vivid memories of that market crash. It is oh-so-easy to look today at a long-term chart having a tiny blip and say "So what! . . . of course the market recovered . . . those who sold were fools."

In 1987, market news was nothing like it is today. We had no Internet. We had the next day's *WSJ* and Friday's 30-minute Lou Rukeyser's *Wall Street Week*; we subscribed to a few stock newsletters (delivered by snail mail) and *Kiplinger* and *Money* magazines . . . that's about it.

Therefore, though I heard about the crash on the radio as I drove home from work on Black Monday, I was not prepared to find my wife in tears . . . her first words were "You've lost our retirement!" (Reading it does not convey the impact of hearing it.)

In real time, the crash was a VERY big event. Fear for a changed future was the natural response. Talking heads were saying "This worldwide event could last for years; our children will have a lower standard of living than we have."

72

105

You will find a lot more examples of these currency and stock markets disasters if you search.

It is the same with Bitcoin Mining and trading. It is risky and expensive. We've explained this in details here: [Is Bitcoin Mining Profitable?](#)

While a sudden and big price movement can leave a negative balance in your trading account, which is your liability to pay to the broker (you will be prosecuted by the broker if you don't), our proven online business system makes money for you, no matter if the stock or currency markets go up or down, not based on who is going to be the United States President, not dependent on whether England will stay with the European Union or not, not affected by whether the US dollar remains the world's first currency or leaves the scene, and not on whether the economy is good or bad.

You can make a lot of money on the currency, stock and real estate markets only when you do it the right way, the way that the professionals do it. You can't turn a \$500 or \$1,000 or even a \$20,000 trading account into millions, nor can you make a living through making money with such an account.

To make money on the currency, stock and real estate markets, first you have to have a lot of money already and a reliable and strong source of income that keeps on making money consistently. This is what we achieve in the first step of following our proven business model that was already explained.

So, Here Is the Step #2:

Once you start making money with the reliable and strong source of income that we create through the first step, you will need to invest a portion of the money you make to make more money and increase your wealth.

You may want to skip this step after completing the first step because you make money with the reliable and strong source of income that we set up for you. However, this step is for those who want to get richer and multi-millionaire which is what we strongly recommend.

Why?

Because making money, paying tax and saving the residual, is not the right way of getting rich and achieving financial freedom at all. The money you save, loses its value gradually. Besides, your money can work to make money for you like a tireless worker who never stops working. You should force your money to make more money for you. This is what all of the successful billionaires like Warren Buffett do.

While your money can work hard and make more money for you, why should you save it in your bank account and let the banks take the advantage of it?

There is no doubt that saving money is an important part of your business, and is what we all must do.

However, you should always use a portion of the money you make, to make more money.

Money is the best tool to make more money. Nothing can make money for you more and better than your money.

How Do We Do It?

The best way to force your money to make more money is through taking the strong investment opportunities on the currency, stock and real estate markets. Usually we combine our currency, stock and real estate investments, not only to make more profit, but also to secure our investments. Here is an example: [A Short Term Investment Strategy That Makes You a Millionaire](#)

We are a big team of professional and successful entrepreneurs and investors who know how to locate the best investment opportunities on the currency, stock and real estate markets.

We not only teach you how to analyze these markets to find the best investment opportunities, we also share the best investment opportunities (trade setups) with you.

Therefore, after a while, not only you will become an independent professional market analyst who is able to analyze the markets on his own, but also you will become richer through taking the investment opportunities that we share with you.

So, on one hand, your automated online business keeps on making money for you (step #1), and on the other, you make more money and increase your wealth through investing a portion of the money that your online business makes.

Therefore, you will become richer and richer. You will become a multi-millionaire or even billionaire finally.

Do you think that billionaires follow a different way to build their wealth?

No; They just make money and then force their money to make more money. That is all.

Once again please note that you don't have to follow this step (#2) to become financially free and rich, because your automated online business (step #1) makes money for you. However, this step (#2) is for those who want to become richer and multi-millionaire which is what you should do too.

We are here to help you to get rich. We want to create a community of millionaires. We don't make a dime if you make billions through following the different investment opportunities that we share with you. Your success just helps us to have more rich people in our community. We want to have a community of millionaires.

Where to Start and What Is the Solution?

Instead of risking your hard earned money to make the others rich, or to pay off the losing companies' debts, spend some time and let some professionals create a real business for you; an automated business that when it starts making money, it keeps doing it, even if you stop working for a while or even a long time.

How Is This Possible?

It is possible through the power of the Internet. In our system, we create strong products, sources of targeted traffic, automated and strong follow-up systems, and...

Our system works automatically once it starts receiving targeted traffic the way we design and develop it.

Most parts of this system and the services you receive from us will be offered to you for free, forever.

If you don't have a business yet, our system creates an automated online business for you.

When you already have a business and you need to take it off the ground and make more profit,

our system will be the strongest and fastest tool to achieve this.

Our system is 99% on autopilot. It means you won't have to do anything. It works automatically.

Would you like to learn more and know how this system works?

There is no obligation, membership fee, deadline and...

If you don't do it today, you will be back to us probably after losing lots of time and money.

Are You Ready to Start?

[Click Here](#) to learn more about this system and subscribe to let us start building your automated online business.

There is no other way to achieve financial freedom with a cheaper price.

Bottom Line

Are you still hesitant?

As long as you aren't brave enough to take some type of action, you will remain where you are right now.

There is no shortcut to success and there is no magic trick for a great life. Most probably you are not going to win a lottery to become rich or at least have a better life than what you have now.

What you have to do is take action. Luck comes to those who are brave enough to take the initial steps and who are willing to take risks.

"The harder you work, the luckier you get."

But, fortunately you are luckier than anybody else, because you don't have to work hard. We have already done everything. Our strong fully-automated system is waiting for you. You just need to start now. That is all.

You are luckier and better-positioned than those who, 30, 20 or even 10 years ago, were where you are right now. You have many things they didn't. They had to take risks and overcome challenges and it was much harder for them. Thanks to the Internet and our proven system, it has become much easier for you to become rich and financially free.

So, take action now and make it possible. Do what it takes to change your life and your financial future.

Opportunities are like the clouds in the sky. They don't last forever; they come and they go. You have to make the most of opportunities, when they are available, while they last, and while you still have time.

Take action right now. Tomorrow may be too late.

*"Don't wait around for things to be just right,
don't wait for things to be perfect,
don't wait for the ideal situation,
because it will never be ideal..."*

*Take this opportunity today...
It might not be here next year,
it might not be here next week,
it might not be here tomorrow.*

This is the only moment that you have... ACT NOW."

Are you ready?

[Click Here](#) to start now.
